

SINLOON®

緊急後備照明燈管

LED Tube - Emergency Lighting

MLL-2FT-10W

MLL-4FT-18W

消防照明 (輔助照明燈管)

依[消防安全(商業處所)條例] (572章)，消防處會在一般例行檢查時，會要求商舖，商業寫字樓或廠房，於每個獨立佔用房間內，安裝符合規定的應急照明燈，以便在電力中斷時，提供應急走火逃生照明。

本公司提供的後備LED照明燈管(10W/22W),符合香港消防處之獨立應急照明系統的標準規定設有後備應急電池，可於電力供應中斷時，立即啟動照明。

其它的應急照明還包括有燈泡型(E27-12W),在斷電情況下可維持3小時的照明電力。

可當一般家居燈泡使用,照常可控 關燈/熄燈。安裝在工商大廈,酒店或住宅走廊,你就不必再擔心摸黑找路了。

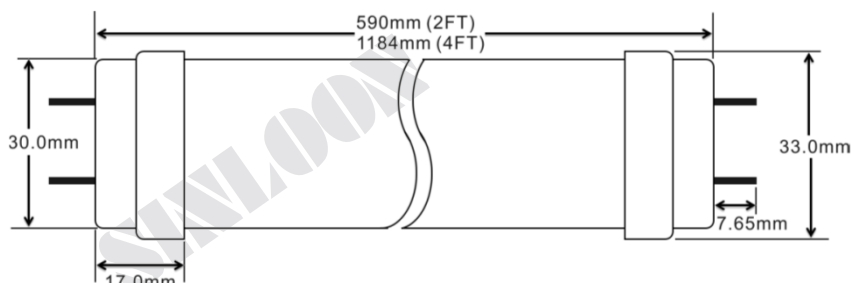

An Emergency Lighting System shall be installed within each separately occupied rooms located within the individual units of the building so as to provide emergency illumination in the event of a power failure.

The Automatic Emergency Light is designed to provide standby but instant lighting at the very moment when sudden power failure occurs.

And it will remain at stand by state again once the main supply is resumed.

規格參數

項目/型號	MLL-2FT-10W	MLL-4FT-18W
尺寸 Size:	G13-T8-600*33mm	G13-T8-1200*33mm
電壓 AC Voltage:	AC110-220V 50/60Hz	AC110-220V 50/60Hz
後備電池 Backup Battery:	Lithium (鋰電池)	Lithium (鋰電池)
充電時間 Charging time:	6-10hrs	8-12hrs
放電 Discharge time:	2-5hrs	2-5hrs
光通亮(有電) Flux On:	900lm	1600lm
光通亮(停電) Flux Off:	2.5W/250lm	5W/500lm
驗證 Verification:	CE; 3C; FCC; RoHS.	CE; 3C; FCC; RoHS.
充電功能Charging function :	Auto cutting power	Auto cutting power
